Education

Melbourne University

Melbourne, VIC

Bachelor of Science, Computing and Software Systems. Deans List

Breadth: Finance, Algorithmic Trading.

Electives: Physics, Probability and Statistics.

Skills & Interests

Technical: Dotnet, C#, TypeScript, JavaScript, React, Html, CSS, Python, Linux, AWS, Azure, Terraform, Kubernetes

Certifications: Azure Fundamentals, AWS Developer Associate, AWS Solutions Architect Associate, AWS SysOps Admin Associate

Interests: Self Hosting

Experience

PointsBet

Melbourne

Software Engineer

Mar 2022 – Nov 2024

- Engineered and extended high-performance .NET microservices on Azure Kubernetes Service (AKS) to launch new promotion features and support novel bet types, directly accelerating marketing campaign rollouts across a high-traffic, real-time betting platform.
- Integrated Azure Service Bus and Azure Cosmos DB to build reliable, highly scalable event-driven messaging systems capable of handling peak platform demand.
- Authored comprehensive unit test suites to maintain high code coverage and system stability, collaborating closely with cross-functional product and engineering teams to deliver resilient backend services.

Deloitte

Melbourne

Full-Stack Engineer

Nov 2024 – Current

- Full-Stack & Backend Engineering: Built scalable Next.js full-stack interfaces with custom pagination workflows, designed Go-based GraphQL APIs integrated with PostgreSQL and AWS DynamoDB, and authored TypeScript/SQL data ingestion pipelines orchestrated via AWS Step Functions for real-time flight data processing.
- Infrastructure as Code & CI/CD Pipelines: Automated cloud infrastructure deployments using Terraform, CloudFormation, Azure DevOps, and GitLab CI/CD; engineered secure container publishing pipelines (Azure Pipelines to AWS ECR) and automated microservice deployments to AWS EKS.
- Performance Optimization & Testing Leadership: Reduced API p95 latency by 80% on AWS Lambda using Artillery and AWS X-Ray; established end-to-end performance and API correctness testing practices using Playwright and TypeScript, diagnosing high-load edge cases and refactoring test suites.
- Cloud Migration & Process Automation: Orchestrated server migrations from on-premises environments to AWS for client engineering teams and developed lightweight Python serverless applications (AWS Lambda, API Gateway) alongside bash-driven S3 automated data pipelines.
